Washington, DC 20460

RE: Carbon Pollution Reduction Grant – Transforming Transit: Accelerating a Zero-Emission Fleet in the Chicago Region

Dear Administrator Regan,

The Metropolitan Planning Council (MPC) supports the Regional Transportation Authority (RTA) in the application for the Carbon Pollution Reduction Grant (CPRG) implementation funding of **\$375 million for the *Transforming Transit: Accelerating a Zero-Emission Fleet in the Chicago Region* initiative**. RTA's project, in partnership with the Chicago Transit Authority (CTA), Metra, and Pace, will build on ongoing regional collaboration to reduce emissions, enhance bus and train service, and grow ridership.

Public transit plays a critical role in advancing regional climate, economic, and equity goals. Our transit system is also an essential tool to address the legacy of racism and segregation in the Chicago region that has left people of color and people experiencing low incomes overburdened with poor air quality and inadequate access to jobs and services.

With \$375 million in CPRG funding for ***Transforming Transit***, the RTA will work with each of the operators to make the following investments:

- **\$125 million for CTA to purchase up to sixty 60-foot articulated buses and two charging cabinets supporting up to 40 pantograph chargers** to be housed in their 103rd Street garage and used to support service for at least two of 25 routes in historically disadvantaged communities.
- **\$125 million for Pace to purchase up to eighty-three 40-foot buses** to be housed in their North (Waukegan) and Southwest (Bridgeview) Division garages and deployed along 23 routes.
- **\$125 million for Metra to purchase 32 trailer cars and 8 docking stations** that will allow Metra to retire 16 of its oldest diesel locomotives and add service on three high-ridership lines.

MPC is an independent planning and policy organization working to address regional built environment issues through a racial and economic justice lens. This project will make significant progress toward the region's goals of moving toward a more sustainable network while prioritizing communities burdened by poor air quality. For these reasons, we urge U.S. EPA's full consideration of RTA's proposal for ***Transforming Transit: Accelerating a Zero-Emission Fleet in the Chicago Region*** under the applicable guidelines.

Sincerely,

Kendra J. Freeman
Vice President of Programs and Strategic Impact
